Patients, clinicians and payors frustrated

Estimated $750 billion -- 30% of U.S. healthcare system often fails to

realignment of financial incentives and the "patient" has underscored need for processes and complex, outdated reimbursement fragmentation of acute and chronic care, prevention failures

excessive administrative costs, and unnecessary services, inefficient delivery, generating exorbitant costs for patients.

The Problem

U.S. healthcare system often fails to achieve "triple aim" health, service, and cost

Estimated $750 billion -- 30% of U.S.

The Problem

U.S. healthcare system often fails to achieve "triple aim" health, service, and cost

Current State

Proposed Solution

Focus on patient-centered navigation and collaboration, resulting in

integrated delivery, integrating existing infrastructure and

resources, leveraging care to patients, through technology,

communications, and health information exchange.

Online operations through community-based assessment tools.

■ Establish multiple community partnerships

■ Improve access to care and health equity through "do it your way" availability

■ Deliver evidence-based practice using multispecialty and interprofessional teams in which providers utilize the full

range of their individual practices.

Current State

Proposed Solution

Focus on patient-centered navigation and collaboration, resulting in

integrated delivery, integrating existing infrastructure and

resources, leveraging care to patients, through technology,

communications, and health information exchange.

Online operations through community-based assessment tools.

■ Establish multiple community partnerships

■ Improve access to care and health equity through "do it your way" availability

■ Deliver evidence-based practice using multispecialty and interprofessional teams in which providers utilize the full

range of their individual practices.

Conclusion

A New Framework. Mobile Integrated Healthcare Practice allows integrated, cost-effective leverage of existing care plan, patient-centered metrics, and the

of broader patient populations.

This model is locally adaptable for both

Multiple Benefits: "Unified" and "Integrated" patient-centered healthcare leverages existing care resources. MIHP offers a novel approach to out-of-hospital care.

Multiple Benefits:

1. Patient-centered care
2. Disease-specific interventions
3. Medical direction
4. Interprofessional education
5. Patient navigation
6. Treatment
7. Immunization
8. Chronic disease management
9. Mental health
10. Substance abuse
11. Hospice
